

Marion County Public Library Resources during Extended Closure

Student can do so much more because of access to IndyPL library cards, services and resources. Our partnership brings special value to the learning students can do while they are not at school.

Reading log. <http://indypl.readsquared.com/>. The reading log will show what books and how many minutes students spent reading while schools are closed. Families with younger readers can register as adults, then register and log for their little ones. Click on the Information tab for instructions. You supply the recognition and prizes! Intrinsic rewards are perfectly fine!

Axis 360. Different URL for each school. Your students have access to tens of thousands of ebooks and eaudiobooks through Axis 360. They can login to their school's Axis 360 via Clever.

TumbleBook Library. <https://www.tumblebooklibrary.com/Home.aspx?categoryID=77>, for grades K through 6. Students DO NOT NEED library cards to access TumbleBooks from home. Students can follow along, listen to books, or read independently. Includes books in Spanish and French.

Streaming video: Both Kanopy and Hoopla offer kids' movies and TV shows, most educational. Kanopy offers more documentaries for high school classes.

Online databases: Ripe for annotated bibliography or "read and reflect" assignments. For students needing to do research, there is a variety of sources to be found at <https://www.indypl.org/research>. Many of them do not require a library card.
